

Automatic Peanut Roaster

The Peanut King

This is the original peanut machine—a machine that has made peanuts a daily article of diet for tens of thousands—a machine that roasts the peanuts to a Queen's taste.

THE PEANUT KING is especially designed for those who specialize on peanuts. It is perhaps the most efficient peanut machine on the market, enthusiastically endorsed by scores of merchants who have built up a big peanut trade.

Description

Extreme height to top of dome, 44 inches.

Extreme length, 40 inches.

Extreme width, 31 inches.

Weight, about 230 pounds; crated, about 310 pounds.

Wood wheels, substantial and nicely finished.

Spring motor, very large and powerful. Has Automatic Safety Lock and winds from either side.

Peanut Cylinder roasts 16 quarts (half bushel) at one roast.

Roller Bearings at each end; very simple to handle.

Has Automatic Dump; also Test Spoon. Gears are of brass and steel, being cut, are very easy running, noiseless, and last much longer than the old style cast gear.

Hot air warmer for keeping peanuts hot.
